

The environmental responsibility of companies, one of the three mainstays of CSR (Corporate Social Responsibility) is particularly important in the current context of global warming and destruction of biodiversity.

As a leader in the regional aviation market, ATR has made this environmental responsibility a focus for development, and is undertaking a proactive strategy, in connection with the expectations of its stakeholders.

Our ambition, along with our stakeholders, is to contribute to an aviation that is more inclusive, more sustainable and more responsible.

ATR honours this commitment through an environmental policy that involves every stage in the lifecycle of our products, and relies on innovation to improve the performance of our aircraft and services.

In line with the principles of ISO 14001, ATR is committed to ongoing efforts to support the company's growth while complying with environmental protection principles:

- › Respecting compliance obligations
- › Constantly improving the environmental performance of sites and products
- › Preventing all environmental pollution.

ATR'S ENVIRONMENTAL AMBITION TRANSLATES INTO THREE COMMITMENTS

1

TO REDUCE CO₂ EMISSIONS TO FIGHT AGAINST CLIMATE CHANGE

Aware of the impact of its activities on greenhouse gas emissions, ATR is committed to reduce its CO₂ emissions on its sites with the goal of achieving carbon neutrality by 2030.

ATR is also committed to providing innovative solutions, by continuing to offer aircraft with a reduced carbon footprint, while involving its partners and suppliers.

2

TO PRESERVE NATURAL RESOURCES AND PROTECT BIODIVERSITY

ATR is committed to optimising the use of natural resources and limiting the use of fossil fuels, by reducing its consumption of raw materials, through waste recovery, and by increasing its use of renewable energies and sustainable alternative fuels.

ATR cares about protecting biodiversity, and undertakes to carry out its production on clean sites, by preventing all disturbance and pollution of the soil, air and water and by joining eco-friendly partnership projects.

3

TO MANAGE THE ENVIRONMENTAL ISSUES ASSOCIATED WITH THE USE OF HAZARDOUS SUBSTANCES

In order to protect its environment and the health of its employees, ATR undertakes to reduce and manage the use of hazardous chemical substances on its sites and prevent all emissions.

ATR also undertakes to work in collaboration with its suppliers to limit the number of hazardous substances in its aircraft, and identify alternatives.
