

MAINTENANCE TRAINING SOLUTIONS

ATR
TRAINING CENTER

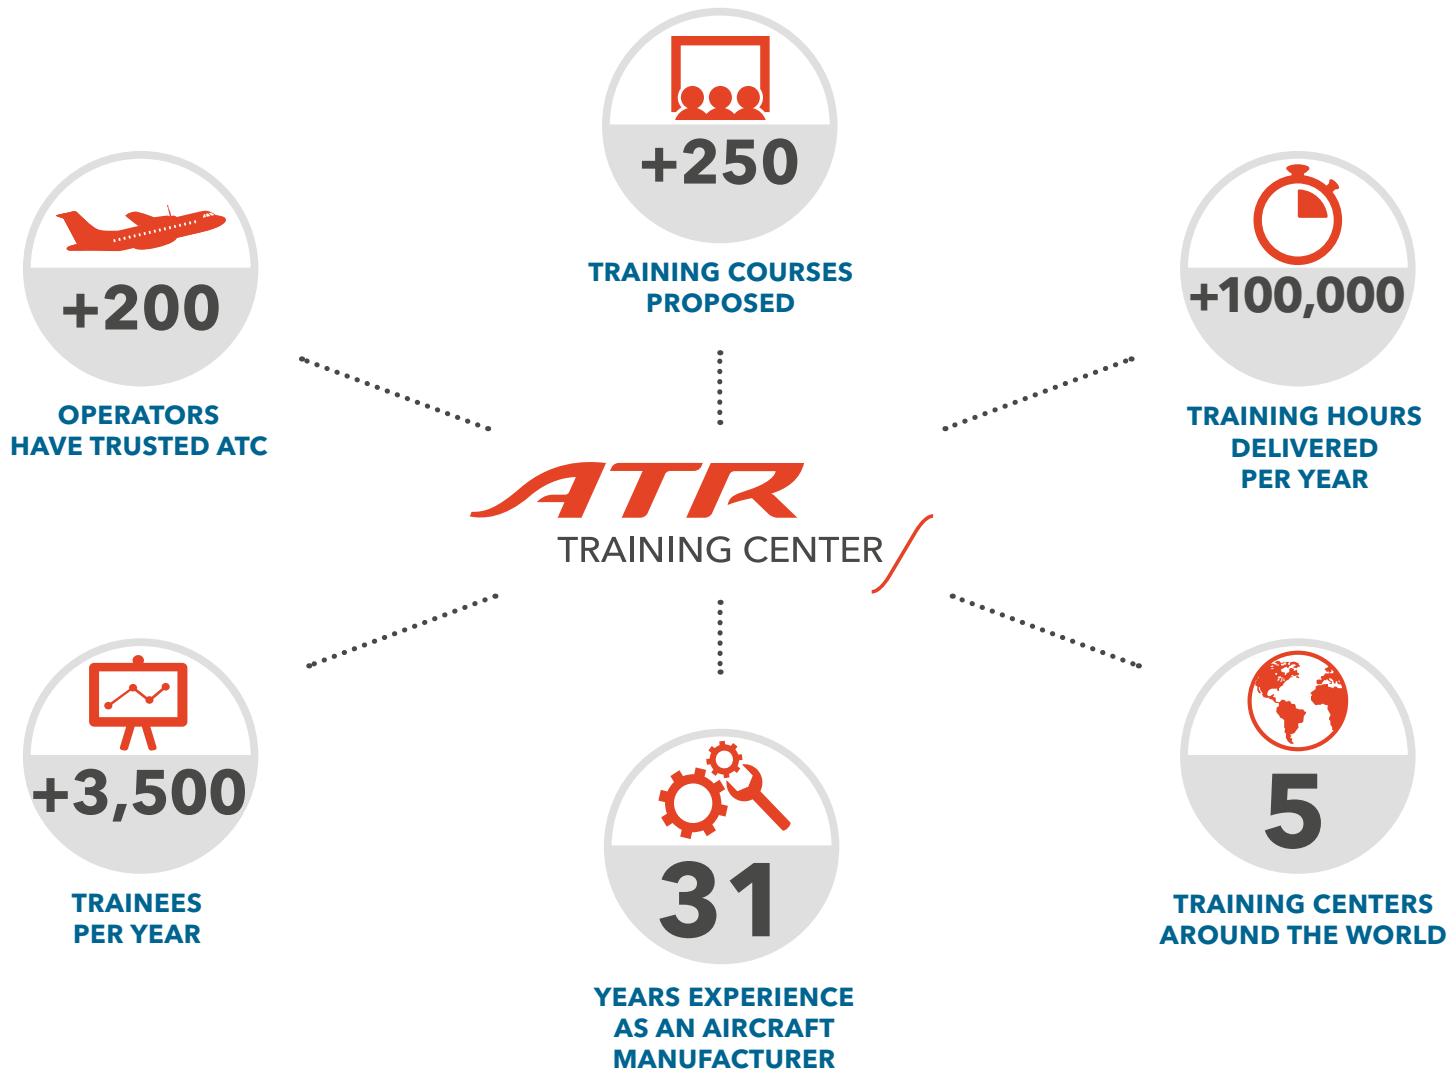

ABOUT ATR TRAINING CENTER

With more than 1,500 aircraft sold and some 200 operators in nearly 100 countries, ATR has developed a full set of innovative and competitive training and services to offer performance and safety for airlines' operations.

Created in 1989, the ATR Training Center (ATC) meets airlines' requirements and provides state-of-the-art and cost-effective training.

ATC is an EASA approved training organisation under PART 147.0003 certificate.

ATR TRAINING CENTER IN NUMBERS

ATR TRAINING CENTER NETWORK & HOME BASED TRAINING*

ATR Training Centers

*** Most of the ATR training courses can be performed at the customer's premises**

The background features a stylized world map on the left, showing continents in green and yellow against a light blue ocean. The map is partially obscured by large, overlapping geometric shapes in red, orange, and light grey. A white curved line, resembling a latitude or longitude line, arcs across the map.

PROPELLING YOUR MAINTENANCE TRAINING, TRUST MANUFACTURER EXPERTISE

Our ATR training programs have been especially developed to highlight the specifications of ATR aircraft and airline operation experience feedback from ATR operators. Our courses are fully compliant with aviation authority requirements and benefit from the ATR Training Center's experience with state-of-the-art computerised training using multimedia and web-based training technology.
